How does the treatment feel?

Most patients experience a mild “snapping” on the skin as the laser is moved over the treatment area. Clarity has a specialized skin-cooling system that provides a more comfortable treatment.

How many treatments will I need?

You may see some hair reduction from your first treatment. However, hair grows in cycles, which requires several treatments to effectively remove unwanted hair growth. Most patients need at least five treatments, spaced 4-8 weeks apart, for optimal results.

How long does a treatment take?

Depending on the size and area to be treated, it could take anywhere from 5-30 minutes.

How do I prepare for a treatment?

Usually the area to be treated should be shaved first to ensure a more comfortable and effective treatment but your physician or practitioner will provide you with detailed instructions prior to your series of treatments.

AESTHETIC VERSATILITY

Tired of Shaving?

Clarity laser hair removal is a non-surgical, non-invasive way of achieving permanent hair reduction for all skin types.

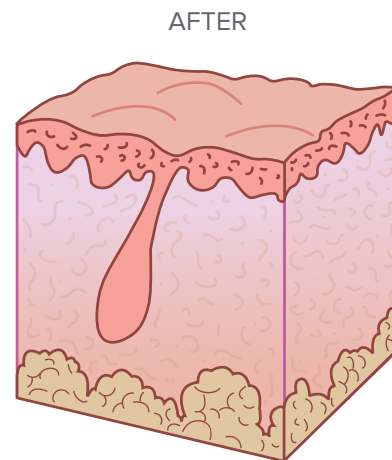

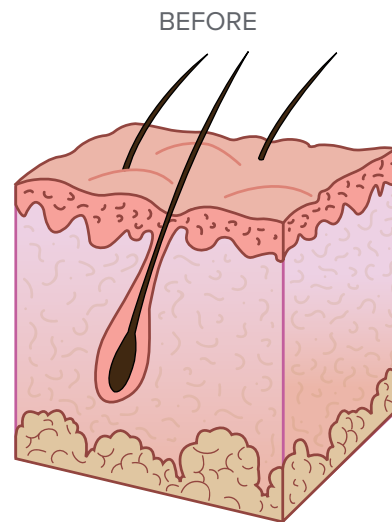

"I've tried different methods of hair removal over the years, looking for the ideal solution. Shaving was time-consuming, waxing was painful and creams were messy and irritating. I finally decided to try laser hair removal with Clarity – the treatments are so much more comfortable than I anticipated and after only two sessions so far, I've noticed a remarkable difference in the regrowth and have yet to pick up a razor!"

— PATIENT M.L., MAYNARD, MA

HOW CLARITY™ LASER HAIR REMOVAL works

Clarity emits a laser beam that travels through the skin and is attracted to the pigment in the hair. The energy then flows to the hair follicle growth cells to inhibit further hair growth.

WHY IS CLARITY SUPERIOR TO OTHER HAIR REMOVAL DEVICES?

All hair removal lasers work by targeting the pigment within the follicles, which means the darker your hair, the easier it will be to treat. However, Clarity has two wavelengths and a proprietary technology that can result in quicker and more effective treatments for all skin tones.
